

AccelPro Secure Access Solution Use Cases

Solution Architecture

Multifactor Authentication

- 01 User Authentication
- 02 Device Authentication
- 03 AD/Radius/LDAP
- 04 SMS Based OTP

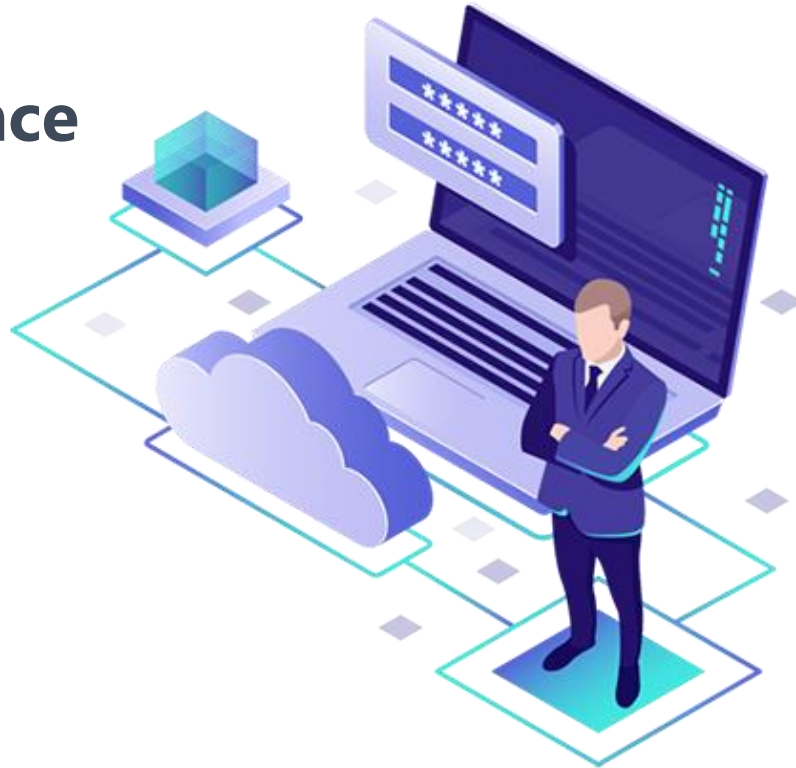

AccelPro **Multifactor Authentication** Benefits

- ✓ SSL/TLS Tunnel Encrypts all the To and Fro Data Packets & provides Data Security over Internet
- ✓ All Communication happens thru Single Port (443) hence provides Shield to your Data Centre
- ✓ Both User and Device is Authenticated which results in better Data and Network Security
- ✓ Strong Authentication Mechanism blocks Unauthorized User and Device Access to your Network

Endpoint Compliance

- 01** Machine Scanning
- 02** Endpoint Intelligence
- 03** Dynamic Access
- 04** Custom Policies

AccelPro Benefits of Endpoint Compliance

- ✓ Checks Endpoint Machines for AV, Firewall and other Security Services
- ✓ Endpoint Security Level Intelligence which enables to achieve Zero Trust Secure Access
- ✓ Dynamically applying Network Access Control Policies on Un Trusted Endpoint Machines
- ✓ Meeting Corporate Security Compliance Regulations for providing Zero Trust Secure Access
- ✓ Blocking Non-Compliant Endpoint Machines Automatically and Restrict their Access

Network Access Controls

- 01** Group Policies
- 02** Application Control
- 03** Multi Parameters
- 04** Block Applications

Benefits of Network Access Controls

- ✓ Control Policies are applied on Groups, different Access is provided to different set of people
- ✓ Access Control Policies are applied on Layer 3 – 7 hence Granular Access Controls are achieved
- ✓ Access Control Policies are applied on various parameters such as Source/Destination IP's, Host, Network and Ports which results in Zero Trust Secure Access
- ✓ Blocking certain Applications on Endpoint Machines results in Endpoint Security
- ✓ Applying NAC on Endpoint Machines, blocks possible attacks on your Corporate Network
- ✓ Network Access Control stops Endpoint Machines to broadcast unwanted data

Fast App/Network Access

- 01 Quick Client Connect
- 02 Fast Application Access
- 03 Data & TCP Compression
- 04 Better User Experience
- 05 Auto Reconnect

Benefits of Fast Application Access

- ✓ Provides much better Performance and results in Fast Secure Access
- ✓ Provides much better End User Experience
- ✓ Provides Seamless LAN Like User experience over WAN
- ✓ Provides Uninterrupted Secure Access Experience
- ✓ Products also works well over Lossy Internet Connections

Data Leakage Prevention

- 01 Block Copy Paste
- 02 Block Local Internet
- 03 Secure Cloud Access
- 04 Admin/User Logs

Benefits Of Data Leakage Prevention

- Protects Data Leakage of your Critical Corporate Applications
- Disallow the Misuse or Sharing of your Company Data
- Apply your Corporate Internet Policies on Remote Users
- Enable Secure Cloud Access for your Remote Users

Business Continuity

01 MPLS Failover

02 DC-DR Failover

03 Silent Mode

Benefits Of Business Continuity

- ✓ Provides Best Alternative or Automatic backup to existing VPN
- ✓ Provides Always ON Application experience
- ✓ Easy to Use, No Manual Configurations required by User as it has Auto Failover/Switching
- ✓ Increases Remote User Productivity
- ✓ Reduced Support Calls and Management Overheads
- ✓ Provides Always Connected User Experience

TSPlus VDI Integration

- 01** App Virtualization
- 02** Desktop Virtualization
- 03** Access Heavy Apps
- 04** No Windows CAL

Benefits Of TSPlus VDI Integration

- ✓ Access any Application from any Device with Ease
- ✓ Access Heavy Applications with Best User Experience
- ✓ Low Cost VDI Solution providing Value for Money and High ROI
- ✓ Virtualize Any Application or entire Desktop for complete Access
- ✓ No overheads, Virtual Application Access over using any Web Browser also
